LogTemp setup for USB Thermometer

Make sure you have installed Prolific (PL2303) driver for Windows and Maxim 1-wire driver.

Open LogTemp main window and from its menu select Show > Setup.

Set **COM - DS9097E** adapter and appropriate COM port number.

Settings [C:\LogTemp\LogTemp.ini]

Configuration
General
Sensors
Saving
Graphics
Temperatures
Humidity Solar
Baroneter
Energy
UV Index
HTML
FHTML
FHT

In Sensors tab make sure DS 18B20 has a tick.

Commit changes by clicking OK and in main window click Go to start taking measurements.
